

Benefits

TAU-II™ Crash Cushion

The TAU-II™ system is a fully redirective and non-gating crash cushion. The system will be provided in lengths and with capacities for both low speed and high speed applications.

Benefits of the TAU-II™ system include:

- Highly Reusable System Elements with Replaceable Energy Absorbing Cartridges
- Cost Effective
- Easy to Install, Quick to Restore
- Narrow Profile
- Adaptable to Most Hazards
- Interchangeable Components

The TAU-II™ system is ideally suited to narrow hazards. It has multiple foundation options and can be applied to both point hazards and longitudinal barriers. This makes the TAU-II™ system ideal for most roadside hazards.
